

APPS

CAPACITIES FOR MOBILITY APPLICATIONS DEVELOPMENT

GMV has a sound experience in the provisioning of diverse telematics Applications on a Smartphone.

On many occasions, the telematics application is provided on different platforms in order to facilitate the access to the applications by the users. Different telematics applications are available on different formats:

- Desktop Web application
- Mobile web application
- iOS / Android App / Windows Phone

Mobile web Applications incorporate a responsive design which allows for its visualization and navigation on any mobile platform (either Smartphone, tablet or other).

Different advantages and disadvantages appear when comparing Mobile Web Applications and native Apps. In GMV, we carry out an analysis to assess the most appropriate solution for our customers' need and have the capabilities to implement any of these formats.

GMV has developed many different Apps to a wide range of customers. The most adequate App can be provided following the specifications and needs of the target users.
