

AUTOMOTIVE

Software Defined Vehicle (SDV) Services

Software is becoming the vehicle's most powerful product

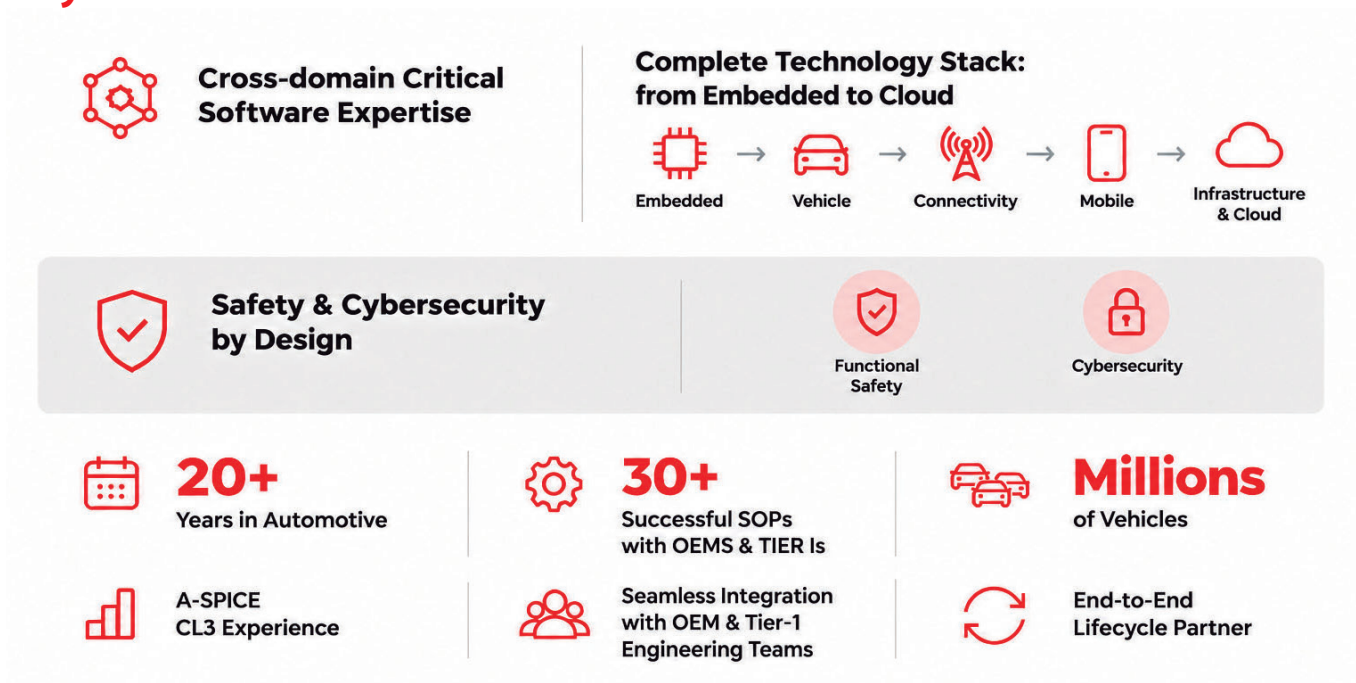

Features

- End-to-end SW engineering.
- SDV architecture, middleware & applications.
- Connected, automated & intelligent vehicle technologies.
- Agile architectures for SDV using Android Automotive.
- Secure software lifecycle and CI/CD for continuous vehicle evolution.
- ISO 26262-aligned software engineering.
- AI assistance throughout the SW lifecycle development.
- Virtual environments and CI/CD automation for faster development.

Key differentiators

Automotive quality standards & certifications
